

APPI-COM

DEFENSE: GET BOTH COMMUNICATION AND SAFETY !

THE NEED:

HANDS-FREE COM ON AN AUTONOMOUS NETWORK!

With teammates above, below, or in a vehicle, the walkie talkies and GSM are poorly suited to hostile environments with noise, water, dust, occupied hands, no network, etc.

THE SOLUTION:

APPI-Com deploys a wireless «Audio Conference» network within seconds, autonomous and encoded, without any installation.

Waterproof and lightweight, APPI-Com is compatible with the wearing of the protective equipment: it offers hands-free full-duplex communication allowing focus on the mission.

With APPI-Com the field engagement becomes more efficient and safer!

SPÉCIFICATIONS

- Range > 1000m line of sight
- Users number: unlimited
- Pager alarm and Immobility detection
- Dim.: 91x48x15mm / Weight: 60g (1.9oz)
- Frequency: 863-870Mhz (Free bands)
- Long range channels: 4 or + (dep. on country)
- Emission power: less than 500mW
- Autonomy: 8 h (talk mode) to 10 h (Listen)
- Charging: USB plug / Li-Poly batteries
- Standards: IP66/IP67 – CE certified
- APPI-Com exists in ATEX version
