

## MEDICAL DEVICE PURPOSE

Spinal immobilizer: allows “extrication” maneuvers in confined spaces, guaranteeing rapid immobilization of the patient’s spine in a neutral position.

N-E-XT can be configured in different ways and with different patient retention systems, allowing its use also as a “Utility Emergency Board”.

Its small size, its weight characteristics and the ability to immobilize in every environment and situation make the versatility of N-E-XT “Xclusive”.

The Fluitans kit is used to immobilize a traumatized patient in deep water while the Tyrah (self-adjustable “rescue triangle” harness), allows the lifting of the patient with winch or rope maneuvers.

## CHARACTERISTICS

**Length:** 90 cm

**Width:** 30 cm

**Height:** 3 cm

**Thickness:** 0.4 cm

**Weight:** 1.5 kg (+/- 50g)

**Weight with accessories:** Pillow kit + headband / helmet elastic straps + belts 2.6kg (+/- 75g)

## TECHNICAL STANDARDS

Registered with the Ministry of Health as a Class I Medical Device;

Complies with Regulation (EU) 2017/745

## ACCESSORIES
